I am concerned with the Wal-Mart trying to step into the financial services arena.

Wal-Mart is a corporation that is motivated entirely by profit, and potential profit. There is no public benefit if they are granted their desire to provide financial services.

Small community banks and Credit Unions stand to lose the most. These types of institutions help the little guy, and they do it without gouging.

Please do not allow Wal-Mart to become a bank. If they want to provide financial services, let it be subcontracted out.
